Jasneet Gill

Second-Year Data Science Student | Python | Data Analysis | Problem Solving
jasneetgill277@gmail.com Brampton, ON LinkedIn GitHub

Education

Wilfrid Laurier University **Sep. 2025 – Apr. 2029**
Bachelor of Honours Science, Data Science *Waterloo, ON*

Skills

Programming: Python, Java, R, MATLAB, Maple
Tools: Excel, ggplot2, Data Analysis, Regression Analysis
Core Skills: Problem Solving, Analytical Thinking

Hackathons & Competitions

HackCanada – Build With AI Hackathon **Mar 2026**
Wilfrid Laurier University
– Collaborated in a fast-paced team environment to design and prototype an AI-driven solution within a **24-hour** timeframe
– Applied problem-solving and rapid iteration to refine a working concept under strict time constraints

CxC – UWaterloo Data Science Competition **Feb 2026**
University of Waterloo
– **Analyzed real-world datasets** to identify patterns, trends, and actionable insights in a competitive setting
– Applied data cleaning and exploratory analysis techniques to support solution development

Data Minds Challenge 2.0 **Apr 2026**
– Participated in a data-focused competition involving analytical problem-solving and structured reasoning
– Explored datasets to extract insights and support decision-making under time constraints

Experience

Academic Tutor **Sep 2023 – Jun 2025**
Math & Coding (Gr. 10–11) *Brampton, ON*
– Delivered individualized and group tutoring sessions in mathematics and programming for **30+ students**
– Designed over **100** custom practice problems and structured study plans to improve student understanding
– Improved student performance by up to **10–20%** through targeted instruction and consistent support

Laurier Computer Science Club **2025 – Present**
Marketing Team Member *Waterloo, ON*
– Supported marketing initiatives to promote club events and increase student engagement across campus
– Helped promote events reaching **100+ students** through digital content and outreach efforts
– Collaborated with team members on event promotion materials and communication strategies

PLASP Child Care Services **2023 – 2024**
Brampton, ON
– Supervised and engaged groups of **10+ children** in structured activities in an after-school setting
– Helped maintain a safe, supportive, and organized environment for children and staff
– Built communication, responsibility, and teamwork skills through consistent childcare support

Projects

Impact of COVID-19 on NBA Game Outcomes (R) **Jan 2026**
– Processed and analyzed a **10,000+ game NBA dataset** (2012–2024) to evaluate the impact of COVID-19 on game outcomes and home-court advantage
– Performed data cleaning and feature engineering, including home/away classification, COVID indicators, and margin categorization
– Built and compared linear regression models to predict point differential using shooting efficiency and game location
– Evaluated model performance using train/validation/test split and RMSE to select the best-performing model
– Created data visualizations using **ggplot2** to identify relationships between efficiency, win rate, and scoring margin

Toronto Crime Analysis (Python) **Jun 2026**
– Analyzed Toronto crime data from 2014–2025 using Python and Pandas to identify trends across crime types and neighbourhoods
– Cleaned and prepared crime datasets by identifying missing values, removing duplicate records, and validating dataset structure
– Used Pandas to rank neighbourhoods by assault and auto theft incidents and identify areas with the largest changes over time
– Created Matplotlib visualizations to compare yearly crime trends, 2025 crime totals, and percentage changes across multiple crime categories
– Calculated correlations between major crime types and compared neighbourhood-level assault rates to uncover patterns in Toronto crime data
